Associate Profiles

ANDRENA SCHERMERHORN

Education:

B.A. in Biology from Luther College

QA Experience:

Andrena has more than 20 years in the dairy industry in the areas of Laboratory Testing and Quality Assurance. She began working at Dairy and Food Laboratories (DFL, now Silliker) in San Francisco. She then moved to the Modesto, CA laboratory as the Microbiology and Chemistry department supervisor. After four years with DFL, Andrena began working as a QA Manager at Sunnyside Farms, where she spent a total of eleven years. She has also served two years as the Laboratory Directory at California Gold Creamery (now DFA) and four years as QA Manager at Model Dairy, in Reno, NV.

QA Studio Experience:

As a QA Manager, Andrena realized the need for an easier way to manage laboratory results. She began working with a computer programmer to develop a program to make testing results meaningful, accessible and easy to interpret. The result was QA Studio. With QA Studio, reports that had previously taken a great deal of time to generate were generated in seconds. Andrena has continued working with QA Studio for the past 18 years.
